-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-3,18-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Brissette et al (US 6,384,634).

Claims 1, 3,18, 19 and 20.

Brissette et al discloses a circuit, see Fig. 1, comprising:

“a domain-synchronizing controller” (208) which produces “a source enable signal” (122) based on a synchronous pulse signal (write clock), the enable signal enabling the capture date from a source domain, and

“a source-enable controller” (208) which produces “a source inhibit signal” for controlling the production of the source enable signal “based on a relationship between a source domain clock and a destination domain clock.” See col.6, line 59 – col.7, line 9.

Art Unit: 2638

Claim 2.

The source inhibit signal is maintained until the data is available to the source register. See col.4, lines 53-56 describing when the buffer is full, the read data will be junk data, indicating that the source inhibit signal is maintained until the data is available to the source register.

Claim 21.

Brissette et al discloses producing a source-input select signal (126) which controls the selection of the data from a plurality of registers.

Allowable Subject Matter

4. Claims 4-12, 22,23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-17,24-30 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y. Kim whose telephone number is 571-272-3039. The examiner can normally be reached on 8AM --5PM M-F.
